Allowable Subject Matter

1. Claims 1-11 are allowed.
2. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and the applicant's arguments filed May 13, 2004, the Examiner finds the claimed invention to be patentably distinct from the prior art of record.

The prior art of record fails to teach or suggest individually or in combination a system and method comprising a proxylet, which is dynamically downloaded by a proxy server computer connected to a network to transform data from a first format to a second format without substantially changing the information content of the data.

The examiner finds the Applicant's arguments found in the response of May 13, 2004 to be persuasive. The applicant argued in substance that the prior art of record does not teach a system wherein a proxylet is dynamically downloaded by a proxy server computer, as opposed to a client computer or a server computer (applet and servlet, respectively) to transform data from a first format to a second format without substantially changing the information content of the data. (See Arguments, pages 6 and 7).

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
